

Here is another typical statement: *"...I am very effected by EMF frequencies. I noticed immediately after having the shungite in my home that the negative electromagnetic radiation was absorbed and transmuted into the positive charge."*

Energetic Balancer

While the U.S. medical establishment may lay claim to advancements in traditional medical procedures, they are primitive regarding healing with energy. The Russian Military Medical facilities have Shungite constructed rooms to facilitate healing. The Russians, it would appear, understand the unique energy field given off by Shungite accelerates healing.

This is accomplished by the fact the Shungite energy field acts upon the energy field in human and animal bodies to balance them. The energy field is actually a blueprint for the human body. If the energy field is out of balance there will be "dis-ease" in the body. It is not just testimonials of extremely fast physical healing that demonstrates this field. Emotional stability also results which is why so many say, "Shungite just makes me feel happy."

How can one measure happiness? How can one prove energy is at work along with fullerenes? Just observation and experience. We are not making medical claims beyond what is known about the healing attributes of fullerenes. What we are doing is making claims about the existence of an energy body that responds to Shungite. Here are some of those non-scientific observations:

* Within seconds of dropping a Shungite nugget into a glass of water, the water has been charged. Energy sensitive people can feel this immediately. Their energy body is responding to the Shungite field. Through what is called "resonance" the energy body begins to vibrate at the natural frequency given off by Shungite. This frequency promotes balance in the emotional, mental and physical aspects of any animal including humans.

* Pour Shungite water into a swimming pool or a bath and the vibrating water molecules cause all surrounding water molecules to begin the Shungite vibration.

* Put a Shungite nugget into Aloe Vera Gel and the 99.9% water of the Aloe begins a vibration that can accelerate healing and decrease pain.

Dylan would probably agree with Dr. Carpenter's conclusion that children are more vulnerable to the computer radiation environments in WiFi schools. We hope someday soon Dr. Carpenter will agree with Dylan's belief that Shungite protects him from EMF in all its forms.

You can read more about the dangers of EMF by doing a search "Dr. Carpenter EMF". And why do you NOT know about a danger that happens daily in every school? Dr. Carpenter believes because this information is being actively suppressed. And the information is clear and undeniable that radiation from electrical and electronic systems pose life threatening harm to humans, particularly children, as well as animals and plants.

Where do you get Shungite?

Your best bet is to get it through the person who handed you this pamphlet. They will work with you to determine how Shungite can help you, your family and work environments. We are currently in the process of developing applications for Shungite filters, water treatment bags of Shungite, and EMF modulator bags with the optimum amount of Shungite for the most powerful Shungite field. And the more we look the more we see products that will use Shungite to counteract attacks against our bodies, minds, emotions and quite honestly our souls.

You can find out what we are finding out at the website below. We are actively encouraging those who buy from our Shungite Store to share with everyone their Shungite Experiences. Please join us. It may be our only hope for a future of happiness.

WHY YOUR CHILD NEEDS A SHUNGITE FORCE FIELD
and why you need to understand this amazing mineral.

"I have a lot of bad days in school because the tests on the computer make me dizzy and hurt my eyes. My Shungite pendant makes me feel protected like a super hero's force field. Now my computer work is fun!

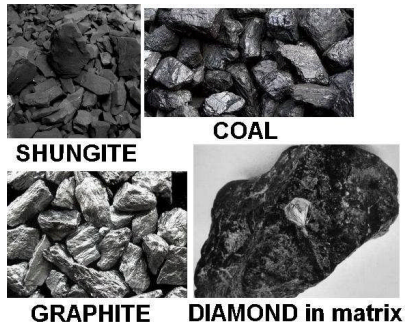

- 7 year old Dylan

According to Dr. David O. Carpenter, M.D, Director of the Institute for Health and the Environment at the University at Albany and an Electromagnetic Field (EMF) subject matter expert, Dylan is under constant EMF attack:

"...health impacts of Radio Frequency (RF)/ Microwave (MW) radiation have found changes in brain function including memory loss, retarded learning, performance impairment in children, headaches and neurodegenerative conditions, melatonin suppression and sleep disorders, fatigue, hormonal imbalances, immune dysregulation such as allergic and inflammatory responses, cardiac and blood pressure problems, genotoxic effects like miscarriage, cancers such as childhood leukemia, childhood and adult brain tumors, and more....Children especially are vulnerable to exposed, because of the susceptibility of their developing nervous systems."

So is Dylan right about **SHUNGITE** protecting him? The Russian scientists believe in the EMF shielding capability of Shungite and it is extensively used for this purposes through a variety of Shungite based building materials. But could a single pendant of a Shungite nugget create Dylan's force field. We believe that is exactly what happens.

Shungite is similar in look and basic composition to coal. Both are carbon based minerals. The word "coal" means "mineral of fossilized carbon". Shungite is 98% carbon. Coal is categorized into nine types if you include graphite. But there is only one Shungite. While coal can be changed by heat and pressure, Shungite is not effected by either heat or pressure. The difference between the two similar materials is in the molecular structure. Simply put, Shungite is made up of molecules that should exist in the vacuum of space but not within the geology of Earth.

Where is Shungite found?

It all started in 1985 with some scientists essentially wondering what types of carbon molecules could exist in the vacuum of space. All life on the planet is based upon carbon and it is of paramount interest. They ended up creating the molecule called a "fullerene". By 1996 other less symmetrical fullerenes were identified and the scientists were given the Noble Prize in Chemistry for their discoveries.

By then the scientific world was enthralled with fullerenes and the search began to find fullerenes in nature. They found some in a meteor strike impact point in Canada. A gold mine in Canada and another in Russia showed fullerenes. And then there is the Zazhoginsky Shungite deposits in the Russian Republic of Karelia near the eastern border of Finland. Fullerenes were found in the tons of Shungite lying on the surface.

The Mystery of Shungite

The unique molecular composition of Shungite has been intensely researched, particularly in regard to

Shungite and water. The molecules are called "fullerenes". Shungite nuggets sitting in water add fullerenes to the water. The fullerenes act to purify the water. When the water is drunk the fullerenes have proven to have healing properties in human and animal bodies.

Shungite powder/sand/crushed varieties have been shown to benefit animals when added to their food and to have a powerful affect on the growth and yield of plants.

Shungite is used as protection against energy fields including electric, magnetic, microwave and nuclear.

And the healing properties of Shungite in water continued to be recognized. Turns out it was the fullerenes. Those out of this world molecules were proven to be an absolute health tonic. Shungite water was used for cooking, baths and inhalation treatments in a children's health clinic. Asthma in the children could be completely cured. It was also determined it had positive affects regarding, food allergies, gastritis and enterocolitis, hepatitis and other infectious diseases. Tula Research Institute found Shungite was a healing accelerator for skin diseases.

Pure Water

Work on the water purification qualities of Shungite continued to prove it just cleans water of everything from pollutants to biological dangers (such as bacteria). No water treatment system is needed for the lakes in and near the Shungite deposits. For the last couple of decades, water treatment systems have been using Shungite instead of the standard charcoal throughout the Russian Federation.

The best example we have seen of the water purification properties of Shungite came from two identical flowers in identical vases. After 3 days the vase next to a bowl of 5 Shungite nuggets was drastically clearer than its counterpart with a green cloudiness to it.

Plants and Animals

The Russians have created a mineral additive called "Shungistim" containing more than 20 nutrients.

Experiments with a variety of farm animals including livestock fox showed the animals to be healthier including their offspring. When added to the soil, the acidity in the soil was lowered and the water retention increased. In one state run test the productivity of potatoes was increased by 80%.

Our own experiences are showing dramatic enhancement of all vegetation. All it takes is a little water soaked in Shungite sprinkled over the plants. Pets wearing pendants, drinking Shungite water, and living in a Shungite EMF environment are clearly showing dramatic improvements in health and behavior.

EMF Protection

The electromagnetic (EMF) shielding qualities of building material made from Shungite is being used "not only in health care facilities, nursing homes, rest homes, but also in enterprises electronic, radio, nuclear industry, communication centers, residential buildings, built on tectonic faults near high-voltage lines." - Dr. Yuri Kalinin, Director General of Research and Production Complex, Republic of Karelia.

Are the Russians and Dylan correct in their assessment they can be protect against the cell destroying EMF with the use of Shungite? The United States completely ignores Dylan, Dr. David O. Carpenter, and the Russian science. It is probably because the only place you can get Shungite is in Russia. But if we were putting Shungite up all over the place, the people might wonder why it was necessary. Goodness they might wake up to the fact that EMF is killing people!

One Shungite nugget on any electrical or electronic device that is constantly on will alter the EMF field in the entire home. While this sounds too good to be true, testimonials continue to come in like this one: "I work under a cell phone tower, never had an explanation for my constant headaches. Since I have my Shungite wow not only I feel great, I am not bloated like I was due to a recent thyroid surgery and my headaches are gone!!!!."
